

TIME-SLOTS: EXPERIENCE MORE, WAIT LESS.

All experience providers want as many customers as possible, evenly distributed across opening hours to manage capacities, and therefore require solutions to allow for demand management and slot allocation within the booking process. TIME-SLOTS ensures that customers always receive the best and most up-to-date offer based on the available staff, space and material.

Guests frequently face disappointment upon purchase of activities and tickets, including that their service will not be available at their desired time or can only be fulfilled for parts of the group/family on the same day. CUBE-TECH aims to ease this concern by only displaying available time slots when the needed products, material and staff are available to fulfil the entire request. This further includes additional services purchased on site via the GEIOS CONNECT travel companion app or via I-PASS mobile ticket purchase.

TIME-SLOTS allows all local partners of any size to gain sales, from small boat to high-tech winter gear rentals. A targeted approach to distributing time-bound packages such as "Early Bird Special" or "Romantic Evening" can further assist with shifting guest volume to less frequented time slots.

Get the most out of your system, your equipment and your business, and offer your satisfied customers the best experience. With a decreasing length of stay and an increasing daily budget, short waiting times are key to ensuring strong client retention, recommendations and optimization of various activities.

WE ARE HAPPY TO PRESENT OUR SOLUTIONS TO YOU PERSONALLY!

ADVANTAGES WITH TIME-SLOTS

- Compensation of peak loads through real-time availability
- Targeted advertising for periods of low utilization
- Better control of day and overnight guests
- Higher customer satisfaction, shorter waiting times
