

EVERYTHING IN ONE CARD: THE KEY TO YOUR DESTINATION.

Our card models are the ideal marketing and promotion tool for your destination to coordinate all service providers and combine all available destination offers under one brand. With the help of GEIOS, you can optimally integrate and connect all services, from tours and activities to local public transport, and make them directly marketable and bookable to customers. Guests further benefit from exclusive advantages, discounts and offers.

It is our mission to convert marketing resources into direct bookings. With **GEIOS** and **SYSTEM4C**, we enable tourist service providers to assist guests before, during and after their stay. **GEIOS CARD** helps market the entire destination and all service providers to generate and measure guest loyalty.

The all-inclusive approach offers guests the entire range of offers from a single source. After all, the highlights of the destination are the factors that motivate them to travel, as research and surveys have clearly shown.

GEIOS CARD is a fully customizable marketing tool for your destination featuring various card types: all-inclusive, purchase and employee cards. The card system can be easily integrated into existing access and reading devices or implemented through our innovative multi-reader (QR code, barcode & chip). A smartphone app for ticket acceptance is also available. All cards are available in physical and virtual form.

No matter which card type you choose: All card types increase the frequency of customers in your destination and attract first-time visitors. This offers you the chance to create returning or regular guests.

WE ARE HAPPY TO PRESENT OUR SOLUTIONS TO YOU PERSONALLY!
