

GEIOS CONTENT

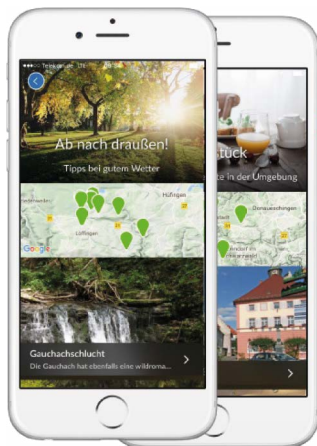

A DESTINATION FULL OF EXPERIENCES: TRANSFORM CONTENT INTO OFFERS.

GEIOS CONTENT integrates content and information of your destination. This enables you to turn an array of content into a structured offer and discover a world of exciting offers to book directly with the various service partners. This encourages guests to discover new experiences and book them directly with service partners through the SYSTEM4C booking system.

It is our mission to convert marketing resources into direct bookings. With GEIOS and SYSTEM4C, we enable tourist service providers to assist guests before, during and after their stay.

GEIOS CONTENT creates premium offers available through the GEIOS CONNECT travel guide app, the digital replica of your destination. Let your guests explore the wide range of choices, from tours and activities to events and weather forecasts. The system automatically integrates appropriate content, marketing texts and images from predefined sources such as Outdooractive, toubiz or meteoblue. Subsequently, our solution displays all generated offerings and recommendations in a consistent branded look.

GEIOS CONTENT does not only generate suitable offers but also allows you to promote direct sales of your local service providers and make them bookable through the SYSTEM4C booking system's CAMPAIGN-MODE.

WE ARE HAPPY TO PRESENT OUR SOLUTIONS TO YOU PERSONALLY!
