

ACCESS WITHOUT WAITING: THE FLEXIBLE ACCEPTANCE SOLUTION.

GEIOS GO turns the guest card and smartphone into a convenient entry ticket, making queues a matter of the past. Your guests receive services via the GEIOS CARD or I-PASS and gain admission without the need to stop at ticket offices.

GEIOS GO gives guests direct access to the (all-inclusive) services of the GEIOS CARD and the services booked online via SYSTEM4C and I-PASS.

All GEIOS and SYSTEM4C systems involved are connected online and enable online acceptance in real time. The only hardware requirement is an active internet connection and a WLAN router.

Depending on the local technology, service providers choose between table and/or handheld code readers. Both versions are NFC, QR and barcode compatible.

In addition to turnstile interfaces we provide separate reading devices and mobile confirmations on smartphone.

We look forward to consulting you on the best solution to suit your needs amongst the many technology options available.

WE ARE HAPPY TO PRESENT OUR SOLUTIONS TO YOU PERSONALLY!

ADVANTAGES WITH GEIOS GO

- On-site sales relief with GEIOS CARD, SYSTEM4C and I-PASS
- Direct entry with digital tickets
- No waiting at the ticket office
